Technical data sheet – Glycoin® natural

Article no.: 10005

Desert resurrection plant *Myrothamnus flabellifolia*, during dry season (left) and after rain (right). Glycoin® natural acts as a protection and re-activation substance in the extremophilic plant.

Glycoin® natural is a multifunctional and safe cosmetic active ingredient exclusively manufactured by bitop.

Glycoin® natural is the only enantiopure and 100% natural Glyceryl Glucoside available in the market.

Trade name	Glycoin® natural
INCI name	Glyceryl Glucoside, Aqua (Water)
Chemical name	2-O- α -D-Glucopyranosylglycerine
CAS No.	22160-26-5
REACH pre-reg. No.	05-2114360777-37-000

Description	small molecule, sugar derivate, enantiopure substance
Structure	

Glycoin® natural

THE CELL ENERGIZER

Specification/content	≥ 50% Glyceryl Glucoside dissolved in water; see specification data sheet
Stability	pH 3–11; high temperatures ($\leq 85^{\circ}\text{C}$); freeze-drying; light & oxygen stable
Solubility	excellent solubility in water (1077 g/l)

Level of use	0.5–2%
Application media	water phase (hot or cold)

Molecular formula	$\text{C}_9\text{H}_{18}\text{O}_8$
Molecular weight	254.24 g/mol
Appearance	slightly yellow liquid
Odor	slightly characteristic odor
pH value	4.0 – 7.5

Density [g/ml]	1.2 – 1.4
Optical refraction [nd]	1.42 – 1.46
Optical refraction [Brix]	50 – 70
Kin. viscosity [mm²/s]	20 – 100

China compliant	yes
EU regulations	no limitations according to the European Cosmetic Regulation (EC) No. 1223/2009. Glycoin® natural can be used for cosmetic formulations under the responsibility of the manufacturer.
USA regulations	not specifically regulated by cosmetic regulations. Glycoin® natural can be used for cosmetic formulations under the responsibility of the manufacturer.
Japan regulations	not specifically regulated by cosmetic regulations. Glycoin® natural can be used for cosmetic formulations under the responsibility of the manufacturer.
EcoCert	yes
COSMOS	yes
Vegan	yes
GM0-free	yes
Non allergenic	yes
Preservation	preservative free
Production process	patented biocatalytical process/ enzymatic reaction according to EN ISO 13485

Shelf life	2 years
Shipping / handling	no restrictions
Storage	at 5–25°C ; after opening: 2–8°C
Pack units	1kg, 5kg, 12.5kg

>> applications

- formulations for mature skin
- skin care for sensitive and allergic skin
- medical skin care / derma cosmetics
- after-sun care
- wound-healing
- color cosmetics
- oral care
- hair care

>> formulation guidelines

- level of use: 0.5–2%
- no incompatibility with other cosmetic active substances
- can be added directly to hot or cold water phase prior to emulsification
- stability: pH 3–11; ≤ 85°C; freeze-drying
- excellent water solubility

>> safety data

Glycoin® natural has an excellent safety profile. Please see MSDS for further information.

>> general information

Origin

The above mentioned product is manufactured by a biocatalytical manufacturing process (enzymatic reaction) according to EN ISO 13485 at the bitop AG plant in Witten, Germany.

BSE/TSE

We do not use components derived from animal sources in the manufacture or formulation of this product.

GM0 (2001/18/EC)

Glycoin® natural is GM0-free.

Substances of Very High Concern (SVHC)

We herewith inform that the above mentioned product does not contain any substances listed in the current candidate list of Substances of Very High Concern published by the European Chemicals Agency (ECHA).

Allergens

The above mentioned product does not contain substances classified as allergenic according to European Directive 2000/13/EC (amended by 2003/89/EC) or 2003/15/EC Annex III (7th Amendment, Cosmetic Directive 76/768/EEC Fragrance Allergens. Though we have not tested the product for content of the chemicals, we do not expect them to be present in significant amounts.

Sweeteners, Flavors, Colors

The above mentioned product does not contain sweeteners (95/31/EC), flavors (88/388/EC+113/2006/EC), colors (95/45/EC) or other substances according to 96/77/EC. Though we have not tested this product for content of the chemicals, we do not expect them to be present in significant amounts.

Antibiotics, preservatives, hormones, steroidal products, dioxine, 1,4-dioxane, gluten

The above mentioned product is not made with antibiotics, preservatives, hormones, steroidal products, dioxine, 1,4-dioxane, gluten. Though we have not tested this product for content of the chemicals, we do not expect them to be present in significant amounts.

Heavy metals and metal catalysts

The above mentioned product is tested for heavy metals individually. See specification data sheet. Metal catalysts are not used for production of the above mentioned product and are not expected to be present.

Bisphenol A, latex, dioxine, 1,4-dioxane, phthalates

These substances are not intentionally added in the manufacture or the formulation of the packaging material. If suppliers tested for these substances, they were not present in significant amounts. Suppliers certified to bitop AG, that the packaging material does not contain any SHVC.
