

Sytenol® A Raw Material Information Profile

Trade Name:	Sytenol® A
Product Code:	BK 1023
INCI Name:	Bakuchiol
Supplier Name:	Sytheon
Country of Origin:	India
Field of application	Cosmetics
Function of the product	Active ingredient
Recommended use concentration	0.5% - 1%
Use restrictions	None

Composition

Chemical Name	CAS#	EC#
Phenol, 4-[(1E, 3S)-3-ethenyl-3, 7-dimethyl-1, 6-octadienyl]	10309-37-2	685-515-4
Compositional break down	Bakuchiol content typically ranging from 99.5 to 99.9% with a moisture content of ≤0.6%	

Additives (intentionally added to maintain quality or stability...)

Chemical Name	CAS#	EC#	%
None			

By-products and impurities

Based on our production process, raw materials and equipment used, we expect that the material contains:

	Not Expected	Yes	Nature & max in ppm / Comments
Residual solvents	☐	X	Methanol, Hexanes & Ethyl Acetate – ≤ 25 ppm; typically, <10 ppm* (see CoA)
Phthalates	X	☐	
Free Ethylene Oxide	X	☐	
Polycyclic Aromatic Hydrocarbon	X	☐	
Glycol Ether	X	☐	
Dioxane	X	☐	
Nitrosamines	X	☐	
Diethylene glycol	X	☐	
Dioxin	X	☐	
Other Impurities			Psoralene & isopsoralene: Total < 25 ppm, typically 2ppm* (see CoA)

*Not a specification. For specifications, please refer to Certificate of Analysis. These impurities are technically unavoidable in good manufacturing practice.

Sytenol®A Raw Material Information Profile

Global Chemical Regulation compliance

Global REACH-like Regulation Status

Country	Regulation	Chemical name	Identification number under specific regulation	Status under specific Regulation
Europe	REACH	Phenol, 4-[(1E, 3S)-3-ethenyl-3, 7-dimethyl-1, 6-octadienyl]	EC# 685-515-4	Registered # 01-2120113117-71-0000 1 to 10 tonnage band
UK	UK REACH	Phenol, 4-[(1E,3S)-3-ethenyl-3,7-dimethyl-1,6-octadien-1-yl]-	CAS# 10309-37-2-	Under DUIN by our local distributor Registration deadline is of 6 years from October 27, 2021
Korea	K-REACH			Exemption for cosmetic use
Turkey	KKDIK			Exempted for < 1 ton/year importation

Global Inventory Status

Country	Inventory	Yes	No	Additional Information
USA	TSCA listed	☐	X	Exemption for cosmetic use
Canada	DSL listed	☐	X	
	NDSL listed	☐	X	
	Schedule 4*	X	☐	Approved for < 1 ton/year importation
Australia	AICS listed	☐	X	
	AICIS exempted or reported introduction*	X	☐	Low risk ingredient - Approved with volume conditions and cosmetic uses. Reported introduction is managed by our local distributor
Philippines	PICCS listed	☐	X	Exemption for cosmetic use
China	IECSC listed	☐	X	
	Record notification*	X	☐	Not compliant for use in cosmetics in China (see cosmetic regulation compliance)
Japan	ENCS listed	☐	X	Exemption for cosmetic use
	ISHL listed**	☐	X	

*Low volume exemption or Chemical imported volume permit/notification is only based on the assumption that the ingredient is imported by Sytheon or its distributors.

**Exemption in case of importation of the cosmetic finished product

Sytenol®A Raw Material Information Profile

Global Cosmetic Regulation compliance

Country	Regulation	Yes	No	Comment
Australia	Classical cosmetic: Industrial Chemicals Act 1989 Schedules (Poisons Standard)	X		Compliant
	Therapeutic Goods Act 1989 - ARTG list	☐	X	Non-Compliant
Canada	Classical cosmetic: The Food and Drug Act, Cosmetic Regulations (C.R.C., ch. 869) Cosmetic Ingredient Hotlist	X	☐	Compliant
China	Cosmetic Supervision and Administration Regulation (CSAR) Safety and technical standard for cosmetics IECIC list 2021	☐	X	Non-Compliant
Europe	EU Cosmetic Regulation 1223/2009	X	☐	Compliant
Japan	Classical cosmetic: Japanese Standards of Cosmetics (Notification No.331 of 2000)	X	☐	Compliant
	Quasi-drugs: Pharmaceutical Affairs Law of Japan (PAL)	☐	X	Non-Compliant
Korea	Classical cosmetic: Cosmetic Act 17250	X	☐	Compliant
USA	Classical cosmetic: Federal Food, Drug and Cosmetic (FD&C) Act (21 CFR 700 to 740) California Safe Cosmetics Program (Proposition 65)	X	☐	Compliant

To the best of our knowledge, Sytenol®A is also compliant with the local cosmetic regulations of the following countries / geographical areas:

Taiwan
New Zealand
Hong Kong
Asean
Gulf countries
Saudi Arabia

Morocco
Andean community - CAN
Mercosur
CACM
India
Russia

Sytenol®A Raw Material Information Profile

Product Specification

X Refer to attached Technical Data Sheet

Manufacturing and Ingredients

Manufacturing location

LAURUS LABS LTD

Plot No. 25, 25A to 25K, UNIT IV, APSEZ De-Notified Area, Lalamkoduru Village, Rambilli Mandal,
Visakhapatnam,
Andhra Pradesh 531011, India (IND)

Production Process

X Refer to attached Flow Chart

Origin

Product	Origin*	Country of Origin
Bakuchiol	Natural/ edible plant seeds of <i>Psoralea Corylifolia</i> Wild	India

**Natural or Plant derivative or Synthetic*

*Natural raw material of plant, animal, mineral or microbiological origin, as such, obtained by physical, enzymatic, or microbiological processes, or obtained by traditional preparation process (e.g., extraction, distillation, heating, fermentation)
For plant origin: Wild or Cultivated*

Sytenol®A Raw Material Information Profile

Statements

Animal Testing

Animal means: a) Live non-human vertebrate animals, including: (i) independently feeding larval forms; and (ii) foetal forms of mammals as from the last third of their normal development (or earlier if the animal is to be allowed to live beyond that stage of development and, as a result of the testing procedures, is likely to experience pain, suffering, distress or lasting harm after it has reached that stage of development); b) Live cephalopods.

(Definition under EU Directive 2010/63)

✓ We certify that Sytheon has not sponsored any animal testing after March 11, 2009, with the product.

Allergens (fragrance)

EU Regulation 1223/2009 - Annex III

Linalool is expected to be present at technically unavoidable levels in trace quantities, originating from the plant (seed). Based on analytical evidence, Linalool content typically is ≤ 550 ppm.

Allergens (food)

EU Regulation 1169/2011 - Annex II: Substances or products causing allergies and intolerances

✓ Based on the information available concerning the raw materials, production process, and equipment used, we certify that the food allergens listed in annex II to Regulation 1169/2011 are not expected to be present.

BSE/TSE

✓ We certify that the Sytenol®A does not contain any ingredient of animal origin and has not been in contact, during its manufacturing process, with raw materials of animal origin. Consequently, the product is not exposed, nor concerned by the risk of Bovine Spongiform Encephalopathy (BSE) Transmissible spongiform encephalopathy (TSE).

Californian Proposition 65

✓ Based on the information available concerning the raw materials, production process, and equipment used, we certify that the product is in compliance with Prop 65 law of California, USA.

CITES and IUCN Red List

✓ We certify that we do not use CITES nor IUCN Red regulated plant species as intentional components of the raw material.

Sytenol®A Raw Material Information Profile

Statements

CMR

CLP Regulation 1272/2008, Annex VI; EU Regulation 1223/2009 Article 15, Substances classified as CMR substances and Article (17), Traces of prohibited substances

- ✓ Based on the information concerning the raw materials, production process, and equipment used, substances meeting the CMR criteria are not expected to be present in Sytenol®A.
- ✓ The Product complies with the provision of Article 15 of EU Regulation 1223/2009 about CMR substances, as amended.
- ✓ The potential presence of technically unavoidable traces of CMR substances (Hexane / CAS 110-54-3) is covered by the provision of Article 17 of EU Regulation 1223/2009. Please refer to RMIP under “By-products and impurities” section for more information.

Gluten

- ✓ Based on the information concerning the raw materials, production process and equipment used, we certify that the presence of gluten is not expected. Therefore, we do not perform any analysis for this substance.

GMO

- ✓ Based on the information concerning the raw materials, production process and equipment used, we certify that the Sytenol®A is not obtained from Genetically Modified Raw Materials (GMO) and does not contain Genetically Modified Organisms (GMO).

Halal

- ✓ We certify that Sytenol®A is halal certified.

Heavy metals

- ✓ We certify that the heavy metals (Pb, Hg, As, Cd) contained in the raw material is ≤ 1 ppm each.
- ✓ Refer to attached Technical Data Sheet.

Irradiation

- ✓ We certify that Sytenol®A has not been exposed to ionizing radiation and does not contain any components resulting from ionizing radiation

Sytenol®A Raw Material Information Profile

Statements

Latex

✓ Based on the information concerning the raw materials, production process and equipment used, we certify that the presence of latex is not expected. Therefore, we do not perform any analysis for this substance.

Nanomaterials

✓ We certify that Sytenol®A is not a nanomaterial as defined by the Cosmetic EU Regulation 1223/2009, the French Decree 2012-232 and the European Commission Recommendation 2011/696.

Natural labels and indexes

Ecocert/Cosmos

Sytenol®A does not comply with Ecocert/Cosmos Natural standard.

✓ Natrue

We certify that the Sytenol®A is 100% Natural by Natrue

✓ Natural Index/Natural Origin Index

We certify that Sytenol®A has a Natural Index NI=1 and a Natural Origin Index NOI= 1 based on the definition of ISO 16128.

Palm Oil

✓ We certify that Sytenol®A does not contain palm oil or palm derived compound.

Pesticides

✓ Based on the information concerning the raw materials, production process and equipment used, we certify that pesticides are not expected to be present. Therefore, we do not perform routine analysis for this substance.

Preservatives

EU Regulation 1223/2009 - Annex V

✓ Based on the information concerning the raw materials, production process, and equipment used, we certify that Sytenol®A does not contain any preservative.

Sytenol®A Raw Material Information Profile

Statements

Residual solvents

Guidelines ICH Q3C and USP General methods <467>

√ We certify that Methanol (class 2), Hexane (class 2) and Ethyl Acetate (class 3) are likely to be present in Sytenol®A. below the concentration limits of the guidelines, as technically unavoidable traces in good manufacturing process. Analyses are performed on each batch (please refer to CoA and RMIP section under “By-products and impurities” section)

SVHC (Substances of Very High Concern)

√ Based on the information concerning the raw materials, production process, and equipment used, we certify that substance of very high concern (SVHC) according to REACH are not likely to be present.

VEGAN

√ We certify that Sytenol®A is obtained from vegetable raw materials and does not contain any animal based raw material. It has neither been produced with raw materials from animal or human origin nor encounter any animal or human material during its manufacturing process. The product is therefore suitable* for vegan and vegetarian.

**“suitable” means that no independent certification is available for our products and the suitability conclusion results from the assessment by SYTHEON of the criteria expressly mentioned in the statement*

VOC

Swiss Ordinance SR 814.018, Annex 1 (Art 2, a), exemption from tax (Article 8) and amendments

√ Based on the information concerning the raw materials, production process and equipment used, none of the substances listed in Annex 1 (Art 2, a) of SR 814.018 are expected to be present above the threshold of 3% (limit given in article 8)

Sytenol®A Raw Material Information Profile

Safety and Environment

Toxicological Information

✓ We certify that the raw material is in compliance with the requirement of the EU Cosmetic Regulation (EC) N°1223/2009 regarding the ban on animal testing and with regards to the marketing in the EU of cosmetic products.

✓ Refer to Toxicological Summary & ECHA link for accessing summary of the studies
