

Technical Information

SYTENOL® A

Product Description

INCI Name: Bakuchiol

CAS number: 10309-37-2

REACH registration number: # 01-2120113117-71-0000

Sytenol® A has the benefits of 15 years of industrial development with selective sourcing of seeds & processing which are the keys to obtain excellent quality Bakuchiol. To date, no other generic Bakuchiol grade extracted from the seeds of *Psoralea corylifolia* come anywhere close to the quality of Sytenol® A. The bakuchiol market progressively gaining retinol market share, this has become a lucrative market for many unethical Asian producers.

All research, safety data and clinical studies were done only with Sytenol® A grade product which is relevant only to unique and specific composition of Sytenol® A. These data are therefore not transferable or applicable to other existing qualities.

Sytenol® A: Bakuchiol >99% purity: SYTHEON	Bakuchi oil, Bakuchiol, Babchi oil: COMPETITION
Purity typically > 99.5%; Consistent quality Monomolecular extraction	Typically, no detectable level of Bakuchiol to 65%. Batch to batch variation; Cold pressed oils or Solvent extraction
Only REACH-registered quality. Sytheon is the sole registrant	No
Full proprietary toxicology and ecotoxicity studies, specific to Sytenol® A quality (Not transferable)	No data available
Very Low psoralen content: Typically, zero to 3 ppm	Either not determined or limits up to 200 ppm
Very Low residual solvents: Typically, zero to 3 ppm. High solvent recycling rate (>95%)	No data available
Large scale dedicated cGMP manufacturing (complying with Western pharmaceutical standards)	Chinese or Indian standard
Nagoya protocol compliance -Sytenol® A is covered by the permit ABSCH-IRCC-IN-258868-1 Bioethical sourcing project initiated (UEBT)	No Opportunistic seed procurement
Time tested supply chain in place – No shortage or delay in product delivery to customers	Opportunistic trading
Own In vitro and In vivo efficacy & clinical studies specific to Sytenol® A quality. Peer reviewed publications.	Exploitation of Sytheon data or literature
Well-defined product with detailed analytical characterization	Partial to No characterization
Market, production, and sourcing experience of 15 years; More than 120 million finish products sold across the world. Monitoring of Cosmetovigilance	Limited experience, Opportunistic seed procurement and trading
Free from pesticides	Undefined
Several patents: US 8,529,967, US 8,859,021; EP 2144590, EP 2144608 & multiple pending patents	None
