

SKINMIMICS® PRO MB

Product Data Record (PDR)

1. General Information

1.1 Supplier

Evonik Operations GmbH
Division Nutrition & Care
Business Line Care Solutions
Rellinghauser Straße 1-11
45128 Essen | Germany
personal-care@evonik.com
<https://www.evonik.com/personal-care>

1.2 Product Description

SKINMIMICS® PRO MB is in full compliance with current Cosmetic Regulation (EC) No 1223/2009.

1.2.1 Raw Material Category/Function

Cosmetic Active Ingredient blend based on Sphingolipids

1.2.2 INCI Declaration

Ceramide EOP; Ceramide NP; Ceramide NS; Ceramide AP; Cholesterol; Behenic Acid; Polyglyceryl-10 Stearate; Polyglyceryl-6 Behenate; Glycerin; Cetearyl Alcohol; Glyceryl Stearate; Sodium Cetearyl Sulfate; Triethyl Citrate; Lactic Acid; Aqua

1.2.3 Composition

Components (INCI EU/US)	Source	Percentage [%]
Ceramide EOP	Vegetable/synthetic/microbial	0.1 – 0.2
Ceramide NP*	Vegetable/microbial	0.4 – 0.7
Ceramide NS**	Vegetable/microbial	0.2 – 0.4
Ceramide AP	Vegetable/synthetic/microbial	0.05 – 0.15
Cholesterol	Vegetable/synthetic	0.4 – 0.7
Behenic Acid	Vegetable	0.1 – 1.0
Polyglyceryl-10 Stearate	Vegetable	3.0 – 6.0
Polyglyceryl-6 Behenate	Vegetable	0.5 – 2.0
Glycerin	Vegetable	2.0 – 4.0
Cetearyl Alcohol	Vegetable	0.1 – 1.0
Glyceryl Stearate	Vegetable	0.1 – 1.0
Sodium Cetearyl Sulfate	Vegetable	0.02 – 0.06
Triethyl Citrate	Vegetable/microbial	1.0 – 3.0
Lactic Acid	Vegetable/microbial	0.1 – 1.0
Aqua/Water		79.0 – 92.0

* Ceramide NP is a combination of Behenoyl Phytosphingosine (Ceramide NP 22), Palmitoyl Phytosphingosine (Ceramide NP 16) and Caprooyl Phytosphingosine (Ceramide NP 6)

** Ceramide NS is a combination of Behenoyl Sphingosine (Ceramide NS 22) and Caprooyl Sphingosine (Ceramide NS 6)

This composition information serves for information of our customers only. It is neither relevant for the composition listing according to Cosmetic Regulation (EC) No 1223/2009, nor does it reflect the chemical composition according to the different chemical regulations in the world which is disclosed in the table "information on ingredients/hazardous components" in the relevant parts of the respective (Material) Safety Data Sheets.

1.2.4 Additives (e.g. Antioxidants, Preservatives)

INCI	CAS No. / REACH Reg. No.	EINECS / EC No.	Content	Function
no additives				

Unless mentioned in our PDR under section 2.2 (By-Products/ Impurities) or 2.3 (CMR Substances), no components which are listed in Annex II of the current Cosmetic Regulation (EC) No 1223/2009 are added to and are not to be expected in the above mentioned product, due to the raw materials and the production process.

2. Production Process

2.1 General Information on the Production Process

The product is obtained by mixing the components.

Description and Origin of plant based materials:

Rapeseed/canola (Brassica), sunflower (Helianthus annuus), corn (Zea Mays), palm (Elaeis guineensis), pine (Pinus), coconut (Cocos nucifera), sugar beet (Beta vulgaris), sugar cane (Saccharum)

Irradiation: SKINMIMICS® PRO MB was not irradiated with γ -rays.

SKINMIMICS® PRO MB is produced in the absence of any animal derived material of any type. Based on the information on the manufacturing process and production site no contamination with BSE/ TSE risk materials is to be expected.

CITES: SKINMIMICS® PRO MB is not based on raw materials from species listed in CITES appendices.

GMO Status:

The item contains moieties from rapeseed, corn and sugar beet (including oils and other refined ingredients). During the production no GMOs and derivatives from GMOs are used. All reasonable measures have been taken to avoid cross-contamination with GMOs or derivatives from GMOs.

2.2 By-Product/Impurities

Below listed compound are technically unavoidable by-products or traces of unremovable impurities (e.g. residual solvents). They are not added intentionally.

Information on potentially occurring by - products, impurities and selected substances of general interest known to be CMR are summarized in section "2.3 CMR Substances".

Known by-products and product specific impurities*

Description	Expected values
Diethylene glycol (DEG)	NMT 0.1 %

Additional standard parameters**

Description	Expected values
Total heavy metals	NMT 20 ppm
As	NMT 2 ppm
Residual organic solvents	not applicable
VOC	NMT 3 % according to SR (Swiss Right) 814.018
Pesticides	meets the valid regulatory requirements for limits on agricultural pesticides
Latex	not to be expected in the product due to the raw materials used and the production process

* monitored by dedicated product analysis or statistical testing

** monitored by statistical testing and/or spot checks

2.3 CMR Substances

According to Cosmetic Regulation (EC) No 1223/2009 the use of substances classified as CMR (Carcinogenic, Mutagenic or Reprotoxic) substances of category 1A or 1B or 2, under Part 3 of Annex VI to CLP Regulation (EC) No 1272/2008 in cosmetic products shall be prohibited.

Some of the CMR substances mentioned below and listed in Annex VI to CLP Regulation (EC) No 1272/2008 may be used as starting materials or solvents for the production of our cosmetic raw materials and may require reporting under California Proposition 65 or the California Safe Cosmetics Act, SB 484.

The presence of these substances has to be seen as non-intended and it is technically unavoidable in good manufacturing practice. Traces of CMR substances can derive from impurities of the starting materials or the manufacturing process.

CMR Substance	CAS No.	Starting material	Max. concentration/ Remark
Ethylene oxide (EO)	75-21-8	no	
Propylene oxide (PO)	75-56-9	no	
Octamethylcyclotetrasiloxane (D4)	556-67-2	no	
2-Ethylhexanoic acid	149-57-5	no	
n-Hexane	110-54-3	no	
Methyl chloride	74-87-3	no	
Dimethyl sulfate	77-78-1	no	
Dioxane (1,4-Dioxane)	123-91-1	no	
Formaldehyde	50-00-0	no	For more information on formaldehyde please refer to our factsheet available via our intoBeauty website. https://intobeauty.evonik.com/

2.4 "Allergens" according to the Regulation (EC) No 1223/2009

The presence of substances, the mentioning of which is required under the column 'Other' in Annex III of Cosmetic Regulation (EC) No 1223/2009, shall be indicated in the list of ingredients in addition to the terms "Perfume" or "Aroma".

None of those substances have been intentionally added to our cosmetic ingredients or are formed during the manufacturing process according to our knowledge of the chemistry. An analytical proof for the absence of traces of those substances is not performed in our cosmetic ingredients.

2.5 Food Allergens listed on Annex II of Regulation (EU) No 1169/2011

None of these substances have been intentionally added to our cosmetic raw materials.

2.6 Nanomaterial

The product is not a nanomaterial according to the definition given by Cosmetic Regulation (EC) No. 1223/2009, the Commission Recommendation 2022/C 229/01, updating Recommendation 2011/696/EU, and the French Decree No. 2012-232. For details, a separate factsheet is available via our IntoBeauty website: <https://intobeauty.evonik.com/>

2.7 Substances of Very High Concern (SVHC)

The candidate list of substances of very high concern is regularly updated and published by ECHA. If applicable, the information on the substance/s from the candidate list, contained in our product in reportable amounts, is included in section 3 of the product related Safety Data Sheet (SDS).

2.8 Country of Origin

SKINMIMICS® PRO MB is manufactured in: Netherlands

3. Animal Testing

We hereby confirm that we have never conducted any animal tests with our product SKINMIMICS® PRO MB nor that we have ordered such tests at third parties or third parties have conducted such tests with our knowledge and acceptance to fulfil the requirements of Cosmetic Regulation (EC) No 1223/2009.

Therefore SKINMIMICS® PRO MB is in full compliance with Cosmetic Regulation (EC) No 1223/2009.

4. Microbiological Status

Total Viable Count: max. 100 cfu/g

Pathogens*: absent/g

* Pathogens are: Enterobacteria, Pseudomonas, Enterococci, Candida albicans, Staphylococci

5. Shelf Life / Storage Conditions

360 days after production (unopened original packaging)

at 5 – 10°C. Transport and short-term storage (up to 1 week) at RT (22 +/-2°C) possible.

6. Regulatory Status

6.1 HS-Code: 382499

EU-CN-Code: 38249992

6.2 Regulatory Status (Chemical Regulations)

Europe

Components Chemical Name/INCI	REACH Status*	CAS No.	EINECS / EC No.
Ceramides/Ceramide NP	Exempt; < 1t/Y	100403-19-8	309-560-3
Ceramides/Ceramide NS	Exempt; < 1t/Y	100403-19-8	309-560-3
9-Octadecenamide, N-[(1S,2S,3R)-2,3-dihydroxy-1-(hydroxymethyl)heptadecyl]-, 2-hydroxy-/Ceramide AP	Reg. No. 01-2120824464-56	212070-45-6	936-560-6
Octadecanoic acid, 27-[(1S, 2S, 3R)-2, 3-dihydroxy-1-(hydroxymethyl)heptadecyl]amino}-27-oxoheptacosyl ester/Ceramide EOP	Exempt; < 1t/Y	179186-46-0	not assigned
3 β -Cholest-5-en-3-ol/Cholesterol	Reg. No. 01-2119976283-30	57-88-5	200-353-2

Glycerol/Glycerin	Exempt; Annex V, No. 9	56-81-5	200-289-5
Sulfuric acid, mono-C16-18-alkyl esters, sodium salts/Sodium Cetearyl Sulfate	Reg. No. 01-2119956652-31	68955-20-4	273-258-7
Triethyl Citrate	Reg. No. 01-2119955435-32	77-93-0	201-070-7
2-hydroxypropanoic acid/Lactic Acid	Reg. No. 01-2119474164-39	79-33-4	201-196-2

*) Any REACH registration no. referred to in this document covers the substance manufactured and/or imported into the European Community by Evonik Operations GmbH (or by our affiliates or by our EU suppliers). In case that a customer purchases material produced outside the EU which was not imported into the EU before supply and subsequently imports that material into the EU, this is not covered by any of our existing REACH registrations.

**) Cetearyl alcohol is a mixture of two different alcohols (Hexadecan-1-ol and Octadecan-1-ol, respectively). Both alcohols were separately REACH registered. The mixture is described by CAS No. 67762-27-0.

Known restrictions:

China:

Triethyl citrate: According to the Chinese Safety and Technical Standards for Cosmetics (STSC), triethyl citrate is restricted regarding its use in cosmetic applications. Maximum in – use concentration for all types of ready to use preparations is 6 % in total (as acid) and a pH of ≥ 3.5 (except rinse-off products).

If triethyl citrate is used in non-sunscreen skin care cosmetics, and contains ≥ 3 % of α -hydroxy acid (in total) or the label claims " α -hydroxy acid", it should be marked with: "Used with sunscreen cosmetics"

Lactic acid: According to the Chinese Safety and Technical Standards for Cosmetics (STSC), lactic acid is restricted regarding its use in cosmetic applications. Maximum in – use concentration for all types of ready to use preparations is 6 % in total (as acid) and a pH of ≥ 3.5 (except rinse-off products).

If lactic acid is used in non-sunscreen skin care cosmetics, and contains $\geq 3\%$ of α -hydroxy acid (in total) or the label claims " α -hydroxy acid", it should be marked with: "Used with sunscreen cosmetics"

7. Toxicology and Ecotoxicology

9. Other Information

China Raw Material Submission Code: 169113-01292-3676

We emphasize that the recommended in-use concentrations provided in our technical product documentation/guideline formulations might exceed the historical in-use concentration limits for Rinse-Off and/or Leave-On products as given in current IECIC.

If the cosmetic product manufacturers would like to use higher ingredient concentration than the maximum use levels on current IECIC for their products placed on China market, it is their responsibility to demonstrate safety of those products.

This information and all further technical advice are based on our present knowledge and experience. However, it implies no liability or other legal responsibility on our part, including with regard to existing third party intellectual property rights, especially patent rights. In particular, no warranty, whether express or implied, or guarantee of product properties in the legal sense is intended or implied. We reserve the right to make any changes according to technological progress or further developments. The customer is not released from the obligation to conduct careful inspection and testing of incoming goods. Performance of the product described herein should be verified by testing, which should be carried out only by qualified experts in the sole responsibility of a customer. Reference to trade names used by other companies is neither a recommendation, nor does it imply that similar products could not be used.
