

MEMORANDUM OF UNDERSTANDING

AI-Driven Personalised Skincare MVP Development

between

Anirban Chakrabarty (www.anodiam.com)

ABN – 56789134510

Sydney, NSW, Australia

and

Effiderma Pty Ltd (CelRevive)

ACN - 669 833 587

Sydney, NSW, Australia

Date: 02/05/2026

1. Purpose of this Memorandum

This Memorandum of Understanding (“MoU”) outlines the preliminary collaboration framework between Anirban Chakrabarty, ABN - 56789134510 (Anodiam, www.anodiam.com) and Effiderma Pty Ltd trading as CelRevive (“CelRevive”), ACN - 669 833 587 for the design and development of an Artificial Intelligence–driven personalised skincare mobile application MVP.

The purpose of this engagement is to:

- Build a **commercially viable Minimum Viable Product**
- Enable **AI-based personalised skincare recommendations**
- Support **CelRevive’s expansion strategy in Australia and international markets**
- Establish a **long-term technical delivery partnership**

This MoU reflects the good-faith intentions of both parties and forms the basis for structured collaboration during the MVP development phase.

2. Background

CelRevive is a skincare brand founded by **Theresa Tobin**, a formulation chemist and cancer survivor, focused on **skin barrier repair and dermatologically informed skincare products**.

CelRevive intends to build an **AI-powered personalised skincare platform** capable of:

- Analysing user skin conditions via smartphone images
- Generating a **360-degree skin profile**
- Recommending customised skincare formulas and active ingredients
- Supporting CelRevive’s product ecosystem and customer experience

Anodiam is an **AI-first product engineering consultancy** specialising in:

- Artificial Intelligence & Machine Learning systems
- Mobile and Web platforms
- Full-stack product development
- Cloud infrastructure and DevSecOps

Anodiam has agreed to **assist CelRevive with the development of a technology MVP** under a **startup-support model providing up to six person-months of development effort**.

3. Scope of MVP Collaboration

The MVP will aim to deliver a **production-grade prototype application** capable of supporting early commercial deployment.

The indicative components outlined below shall be jointly prioritised by the parties. Implementation during MVP phase will be limited to those components that can reasonably

be delivered within the agreed contribution of up to six (6) person-months of engineering effort provided by Anodiam as part of the MVP development engagement.

3.1 Mobile Application

- Smartphone-based skin photo capture
- User profile creation
- Skin concern selection and questionnaires

3.2 AI Skin Analysis System

- Image processing pipeline
- Skin condition classification models
- Feature extraction for skin health indicators

3.3 Personalised Skincare Recommendation Engine

- Customer profile generation
- Ingredient matching engine
- Base formulation recommendation

3.4 Formulation Rule Engine

CelRevive will provide guidance to encode:

- Ingredient compatibility rules
- Safety and formulation constraints
- Non-overridable product formulation logic

3.5 Ingredient Knowledge Base

Structured database containing:

- Ingredient properties
- Clinical evidence
- Supplier information
- Functional categories

3.6 Admin Dashboard

For CelRevive team use:

- Ingredient management
- Recommendation tuning
- Product configuration

3.7 Infrastructure

- Cloud deployment architecture
- Secure API services
- Scalable backend framework

4. MVP Effort Commitment

Anodiam will contribute **up to six (6) person-months of engineering effort** toward building the MVP.

This effort may include:

- Architecture design
- AI model development
- Backend engineering
- Mobile application development
- DevOps setup
- Quality assurance

The MVP scope will focus on **core monetizable features only** and will **not include full enterprise production hardening**.

5. Delivery Model

Anodiam will operate under a **senior-led engineering model**.

Typical structure:

Onsite Lead, Australia

Responsible for:

- Architecture design
- Technical leadership
- Product alignment with CelRevive

Offshore Engineering Team

- Senior developer
- 2–3 junior engineers / interns under supervision

This model allows **cost-efficient development while maintaining senior oversight**.

6. Agile Development Process

The collaboration will follow an **Agile delivery model**:

- Weekly requirement discussions

- Monthly development sprints
- Iterative feature releases
- Continuous feedback and refinement

CelRevive will nominate **one primary product representative** responsible for feature validation.

7. Intellectual Property (IP) Framework

Both parties agree to the following IP ownership structure.

7.1 CelRevive Intellectual Property

CelRevive retains exclusive ownership of:

- Skincare formulations
- Ingredient research
- Clinical insights
- Product concepts
- Brand assets
- Therapeutic research
- Business strategies

7.2 Anodiam Intellectual Property

Anodiam retains ownership of:

- Generic AI models and algorithms
- Software frameworks
- Reusable engineering components
- Development tooling
- Platform architecture patterns

7.3 MVP Product Rights

For the purposes of this clause 'Project Deliverables' means all software, code, applications, documentation, and other materials developed specifically for CelRevive by Anodiam in connection with this MoU, excluding Anodiam Background IP.

Upon delivery of the Project Deliverables, all Intellectual Property Rights in any Project Deliverables will vest in CelRevive.

Anodiam retains ownership of all pre-existing generic AI models, software frameworks, reusable engineering components, and development tooling (Anodiam Background IP). To the extent that any Anodiam Background IP is incorporated into the Project Deliverables, Anodiam grants CelRevive a perpetual, irrevocable, royalty-free licence to use, modify, and sublicense such Anodiam Background IP solely as incorporated within the Project Deliverables.

8. Confidentiality and Non-Disclosure Agreement

Both parties acknowledge that confidential information may be shared during the collaboration.

Each party agrees that it will:

- Maintain strict confidentiality of all proprietary information
- Use such information only for the purpose of this project
- Not disclose confidential information to third parties without written consent

Confidential information includes but is not limited to:

- Product formulations
- Ingredient databases
- AI models and algorithms
- Business strategies
- Financial information
- Technical architecture

This confidentiality obligation shall remain in force for **five (5) years following termination of the collaboration**.

9. Data Ownership

All customer data generated through the CelRevive platform will remain the **exclusive property of CelRevive**.

Anodiam may use anonymised datasets solely for:

- Model improvement
- Internal research
- Algorithm development

No personally identifiable information will be retained by Anodiam.

10. Founder Engagement Requirement

The success of an MVP requires **active participation from the founding team**.

CelRevive agrees to:

- Provide timely product feedback
- Participate in sprint reviews
- Supply formulation and ingredient data
- Allocate a product owner for requirements clarification

Failure to provide required inputs may impact delivery timelines.

11. Founder Project Abandonment Clause

In the event that:

- The CelRevive project becomes inactive for **60 consecutive days**, or
- CelRevive founders discontinue engagement without written notice,

Anodiam reserves the right to:

- Pause all development activity
- Reallocate engineering resources
- Archive the MVP codebase

Reactivation of the project may require **a new engagement agreement**.

12. Liability and Medical Disclaimer

The MVP system is intended to provide **informational skincare recommendations only**.

It does not constitute:

- Medical advice
- Dermatological diagnosis
- Treatment prescription

CelRevive remains responsible for:

- Product safety
- Ingredient compliance
- Regulatory approvals

Anodiam assumes **no liability related to skincare outcomes or medical claims**.

13. Sustainability and Ethical AI

Both parties agree to follow responsible AI practices including:

- Transparency of AI-generated recommendations
- Bias mitigation in skin analysis models
- Secure data handling practices

14. Future Commercial Engagement

After completion of the MVP phase, the parties may enter into a **commercial development agreement** for:

- Platform scaling
- Advanced AI models
- International product rollout
- Regulatory integrations

Such agreements will be negotiated separately.

15. Term of this MoU

This MoU will remain valid for **three (3) months** from the date of signing unless replaced by a formal contract. Either party may terminate this MoU with **30 days written notice**.

16. Governing Law

This MoU shall be governed by the laws of **New South Wales, Australia**.
