CelRiv™

nodiam
TECHNOLOGY PARTNER

Your Trusted Technology Partner — Committed to Excellence, Every Step of the Way.

A focused consulting partnership that supports CelRiv with the best technology services to achieve your product, market and global growth ambitions.

CelRiv leads

Business vision and domain expertise

- Product vision & roadmap
- Skincare science & formulation
- Brand, customers & market positioning
- Funding, investor relations & growth strategy
- Market expansion (US & international)
- Commercial decisions

CelRiv owns the business.

Anodiam enables the technology.

A consulting-led partnership aligned to commercial outcomes.

Anodiam delivers

Technology strategy and execution

- Solution architecture & design
- AI & software engineering
- Cloud, DevOps & infrastructure
- Quality assurance & security
- Integration with existing systems (Shopify, fulfilment etc.)
- Delivery management & technical advisory

What CelRiv receives

- A dedicated technology partner
- Senior-led delivery team
- Faster path from idea to market
- Scalable, production-ready platform

How Anodiam is engaged

- Fixed scope or time & materials
- Resource-based consulting model
- Transparent billing and reporting
- Ongoing support and optimisation

Your business. Our technology. A partnership for what's next.

CelRiv™

nodiam
TECHNOLOGY PARTNER

From Strong Foundations to Global Scale

Anodiam will deliver the end-to-end technology capabilities to turn CelRiv's vision into a secure, scalable and market-ready platform.

1 Customer Experience

AI-powered, personalised skincare journey

- AI based and deterministic detection of skin concerns
- Personalised recommendations
- Explainable AI (why this works)
- High accuracy and continuous improvement

2 Formulation Intelligence

From detection to product recommendations

- Recommend the right actives and bases
- Proprietary formulation logic
- Tailored to skin type and concerns
- Transparent and explainable recommendations

3 Shopify Integration

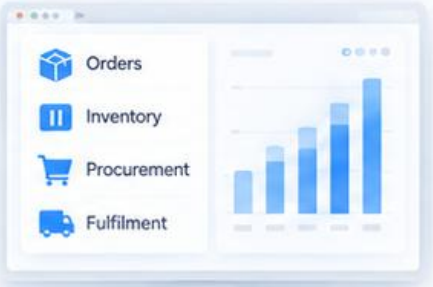

Seamless commerce experience

- Integrate with existing Shopify storefront
- Personalised product display
- Cart, checkout and customer data sync
- Unified customer experience

4 Business Operations

Tools and integration for efficient fulfilment

- All tools and integrations for fulfilment and logistics
- Procurement and inventory management
- Business data and analytics (BI)
- Dashboards and operational reporting

5 Production Ready & Scale

A secure, scalable and reliable platform for growth

- Production grade functionality
- Ready for market and investors
- Scalable for US and international expansion
- Ongoing optimisation and feature enhancement

Built on a Strong Technical Foundation

Robust, secure and cost-efficient platform for long-term success.

Cloud, DevOps & Release Management
Automated, reliable and scalable deployment

Cyber Security
Protect customer data and ensure compliance

Token & Cloud Cost Optimisation
Efficient and sustainable operations

QA & Accuracy
Rigorous testing and continuous improvement

Production Support
Proactive monitoring and reliable support

Your skincare vision. Our technology expertise. A platform built for customers, growth and a global future.

TECHNOLOGY PARTNER

Delivery Excellence for Real Outcomes

A disciplined, agile approach that turns strategy into a secure, scalable and market-ready platform.

1. **Define**
   - **Clear goals and priorities**
     Product vision, user journeys and success criteria
2. **Design**
   - **Solution and architecture**
     User experience, AI integration, security and scale
3. **Build**
   - **Agile development in sprints**
     Iterative builds with continuous client feedback
4. **Test**
   - **Quality and validation**
     Functional, security, performance and user testing
5. **Release**
   - **Controlled launch**
     Deployment, training and production readiness
6. **Monitor & Improve**
   - **Real-world insights**
     Usage analytics, AI optimisation and continuous enhancement

Built-in Quality. Lower Risk. Faster Impact.

- **Lower delivery risk**
  Issues identified early and resolved before they scale.
- **Higher product reliability**
  A stable, secure and dependable experience for customers.
- **Faster feedback and improvement**
  Real user insights drive continuous optimisation.
- **Safer releases**
  Controlled changes with versioning and rollback.
- **Stronger production readiness**
  A reliable, scalable platform ready for global markets.

Built for Customers. Ready for Investors. Prepared for Global Scale.

A technology foundation that drives commercial success and supports international expansion.

- **AI-Powered Differentiation**
  Proprietary formulation intelligence and explainable recommendations.
- **Measurable Traction**
  Usage, conversion and customer insights to demonstrate value to investors.
- **Operational Confidence**
  Security, reliability and governance for customers and partners.
- **Global Expansion Readiness**
  US commerce, fulfilment and regulatory preparation for international markets.
- **New Product Opportunities**
  A scalable platform to launch new formulations and services.

Disciplined delivery today. Commercial success tomorrow. A global skincare brand, together.

CelRiv™ | Anodiam TECHNOLOGY PARTNER

6-Month Commercial Model

A Dedicated Team to Build, Launch and Scale

Senior-led. Cost-effective. Production-ready in 6 months.

Anodiam delivers a dedicated, experienced and cost-efficient team to build a secure, high-quality, AI-powered platform for CelRiv, with fast, feedback-driven delivery and full production readiness.

Roles & Responsibilities

Clear ownership ensures faster decisions and better outcomes.

CelRiv Leads

Product direction, business outcomes and stakeholder input.

- Product vision & roadmap
- Defines pilot users
- Business decisions (sales, marketing, expansion)
- Prioritises requirements
- Provides feedback
- Named Product Owner (weekly availability)

Anodiam Delivers

Solution design, development and delivery execution.

- Solution architecture & design
- AI, software engineering & integrations (Shopify and other tools)
- Cloud, DevSecOps & infrastructure
- Security, compliance & data privacy
- Quality assurance & release management
- Production support & continuous improvement

Team Composition & Commercials

A balanced, senior-led team with the right skills to deliver in 6 months.

1 Solution Architect	1 Delivery Lead	3 Developers (FTE)	3 Interns (Shadow Team)
Onsite (Sydney)	Offshore (Kolkata)	Offshore (Kolkata)	Offshore (Kolkata)
20% allocation	100% allocation	100% allocation each	100% allocation · No additional cost
• Solution architecture • Technical leadership • Client collaboration • Quality & delivery oversight	• Delivery management • Sprint execution • Team coordination • Client reporting	• Full-stack development • AI & backend integration • Frontend & Shopify integration • Testing and deployment	• Support development • Testing & quality assurance • Research & documentation • Future manpower pipeline

Engagement Period	Total Team Size	Total Cost (6 Months)	Billing Basis	Generous Discounts Available
6 months	7 members 1 onsite + 6 offshore (3 FTE + 3 interns)	~ AUD 142.8K (~ AUD 23.8K per month)	Monthly All inclusive (resources, management and delivery support)	Based on scope, commitment and long-term collaboration.

A lean, experienced and dedicated team — delivering real outcomes for CelRiv. **With generous discounts to support your growth.**

CelRiv™ | Anodiam TECHNOLOGY PARTNER

Engagement for Product Design & Delivery

CelRiv leads the product vision, business decisions and user insights.
Anodiam partners to design, build and deliver the technology — through a clear, agile and collaborative engagement.

Roles & Responsibilities

Clear ownership ensures faster decisions and better outcomes.

CelRiv Leads

Product direction, business outcomes and stakeholder input.

- Product vision & roadmap
- Defines pilot users
- Business decisions (sales, marketing, expansion)
- Prioritises requirements
- Provides feedback
- Named Product Owner (weekly availability)

Anodiam Delivers

Solution design, development and delivery execution.

- Solution architecture & design
- AI, software engineering & integrations (Shopify and other tools)
- Cloud, DevSecOps & infrastructure
- Security, compliance & data privacy
- Quality assurance & release management
- Production support & continuous improvement

How We Start

A structured, agile and collaborative approach to move from idea to execution.

1 Appoint & Align
- Named Product Owner
- Confirm pilot users
- Align on goals, success metrics and scope

2 Discover & Understand
- Listen to users and stakeholders
- Review existing assets and research
- Identify highest value problems

3 Define & Plan
- Prioritise requirements
- Create solution design and backlog
- Agree on sprint plan (4-week cycles)

4 Build &demo
- Develop in agile sprints
- Regular demos
- Continuous feedback and improvements

5 Validate & Prepare
- User testing and pilot feedback
- Refine, optimise and harden
- Prepare for production

6 Launch & Scale
- Production-ready release
- Ongoing support
- Iterate and scale to new opportunities

4-week sprint → Demo → Feedback in 1–2 weeks → Next priorities

Key Principles for Success

- **Secure by Design** — Privacy, security and compliance
- **High Quality** — Robust, reliable and scalable solutions
- **Cost Efficient** — Optimised tools and cloud usage
- **Transparent Advice** — Options, trade-offs and early escalation
- **Full Visibility** — Regular demos, reports and metrics
- **Ongoing Support** — Production support and continuous improvement

A focused and collaborative engagement to turn CelRiv's vision into a secure, scalable and market-ready platform.

CelRiv™

nodiam
TECHNOLOGY PARTNER

AI Builds. Anodiam Governs. CelRiv Grows.

A modern, AI-agent-driven approach to design, build, enhance and maintain CelRiv's technology — with human expertise, scientific oversight and commercial focus.

CelRiv Leads

Product vision and direction

- Skincare science & formulation
- Customer experience
- Business priorities
- Final approvals

AI Agents Execute

Design, build and continuously improve

- Build new features
- Test and fix defects
- Integrate systems (Shopify, APIs)
- Generate documentation
- Monitor and learn from usage

Anodiam Assures

Architecture, quality and delivery

- Solution architecture & design
- Cloud, DevSecOps & infrastructure
- Security, privacy and compliance
- Release management
- Production support & continuous improvement

One Connected CelRiv Platform

From personalised skincare to commerce, fulfilment and business operations.

AI Personalisation
Questionnaire + image analysis

→ **Proprietary Formulation Engine**
Skin concerns, actives and bases

→ **Shopify Integration**
Personalised products and seamless checkout

→ **Fulfilment & Procurement**
Inventory, orders and logistics

→ **Business Intelligence**
Dashboards and operational insights

→ **Global Scale**
US and international expansion

Key Outcomes for CelRiv

Faster Delivery
From idea to production in shorter cycles

Consistent Quality
Built-in testing, security and best practices

Cost Efficiency
Intelligent automation and optimised resources

Easier Scaling
A platform ready for new markets and growth

AI handles more of the engineering work. Anodiam remains accountable for delivery. CelRiv stays in control.

Progressive rollout over 24 months

CelRiv™

TECHNOLOGY PARTNER

Roadmap to Agentic AI Engineering

A phased and practical journey over 24 months — from a strong MVP to an AI-native engineering operation, without compromising quality, security or business continuity.

01 Foundation
Months 1 – 3

- Set up AI-assisted development environment
- Stabilise and complete MVP
- Establish standards, testing and documentation
- Train AI agents on CelRiv codebase and domain knowledge

Outcome
A strong, stable foundation with AI supporting the team.

02 Agent-Assisted Sprints
Months 4 – 6

- AI agents build, test and integrate new features
- Implement database, API and Shopify enhancements
- Automate testing and documentation
- Human review and approval for all releases

Outcome
Faster, more efficient delivery of new features.

03 Coordinated AI Engineering
Months 7 – 12

- Multiple AI agents collaborate across development, QA, DevOps and integrations
- Enhance AI personalisation engine (image analysis, recommendations)
- Integrate fulfilment, procurement and business tools
- Deliver complete, tested features through agent workflows

Outcome
More automation across the entire product and business ecosystem.

04 Intelligent Maintenance
Months 13 – 18

- AI agents monitor systems and detect issues early
- Automated testing, regression checks and security updates
- Propose and implement low-risk fixes
- Human oversight for critical changes and scientific validation

Outcome
Proactive maintenance with less downtime and fewer disruptions.

05 AI-Native Operations
Months 19 – 24

- Agent-first enhancements and feature delivery
- Continuous optimisation of performance, cost and security
- Support new markets and international expansion
- A lean, scalable engineering operation with Anodiam governance

Outcome
A globally scalable platform ready for long-term growth.

Long-Term Value for CelRiv

Faster Innovation
New features and improvements in shorter cycles

Higher Quality
Built-in testing, security and best practices

Operational Efficiency
Automated, reliable and cost-aware delivery

Future Ready
A flexible platform for new markets and opportunities

Build for today's launch. Engineer for tomorrow's scale.

24-month roadmap
Indicative timeline, subject to business priorities and successful milestone outcomes.
